Board of Visitors, Clark School of
Engineering, UMCP

External Advisory Board, UMCP
Chemical and Biomolecular
Engineering Department

Past President, Engineering Alumni
Board, UMCP

Educational Background

B.S. Chemical Engineering,
University of Delaware

Ph.D. and M.S. Chemical Engineering,
University of Maryland, College Park

From Scientist to Serial Entrepreneur: An Unlikely Journey

How does a scientist who only wanted to do research and develop mathematical models end up being a serial entrepreneur? It was an interesting journey, but that's exactly what happened to Dr. Kimberly Brown, CEO, Amethyst Technologies, LLC.

Kimberly started Amethyst Technologies 12 years ago. Amethyst's work includes supporting improved diagnostics and health outcomes for 50,000 HIV/AIDS patients in Kenya, quality improvement for 2,000 facilities in Tanzania that support HIV/AIDS patients, implementing the training program to support FDA compliance for 1,000 scientists at the US Army Medical Research Laboratory, training healthcare workers during the Ebola outbreak in Liberia, and performing assessments of hospitals in Iraq for compliance to international standards.

Amethyst started with one employee and one client in 2007 and now supports five US government agencies, two African governments, and numerous private sector manufacturing and biotechnology companies.

Come join us and learn how Kimberly accomplished all this in such a short period of time.

Wednesday, March 13, 2019

Noon - 1 p.m.

University Center 312

The Raymond V. Haysbert, Sr. Entrepreneurship Lecture Series provides a platform for successful entrepreneurs to candidly share their experiences and insights with UMBC students, faculty, alumni and the Baltimore business community. The series highlights experiences, lessons learned and unique issues and challenges faced by entrepreneurs in the creation of a new enterprise.
